SUMMARY

Backend-oriented fullstack developer with experience building Laravel REST APIs, React-based web applications, and automation workflows using Python and SeleniumBase. Experienced in implementing payment workflows, webhook handling, scheduling systems, and automated data collection pipelines. Interested in backend development, workflow automation, and web application engineering.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, SQL

Frameworks & Libraries: Laravel, React.js, Node.js, SeleniumBase

Databases & Search: MySQL, PostgreSQL, MongoDB, Redis, Typesense

Tools & Technologies: Docker, Git, REST API, Midtrans, Vercel

EXPERIENCE

Web Scraper Intern

Apr. 2025 – Oct. 2025

PT Universal Big Data (UBIG)

Malang, Indonesia

- Built automated web scraping workflows using Python and SeleniumBase to collect courier pricing data from multiple logistics service providers
- Implemented automated origin-destination pairing workflows to collect large-scale pricing data across different regions
- Maintained and updated scraping selectors when target website structures changed
- Stored and managed scraped data in MySQL databases for further processing and business usage
- Worked with headless browser automation for long-running scraping processes handling thousands of data records

PROJECTS

E-Commerce Platform | *Laravel, React.js, MySQL, Redis, Docker, Midtrans, Typesense*

Nov. 2025 – Jan. 2026

- Developed a full-stack marketplace-style e-commerce application using Laravel REST API and React frontend architecture
- Implemented multi-role authentication and authorization for buyers, sellers, and administrators using Laravel Sanctum
- Implemented marketplace-style payment workflows using Midtrans integration, webhook handling, and delayed seller payout logic
- Implemented automated delayed payout scheduling for seller settlement using Laravel Scheduler
- Integrated Typesense search engine for product search and filtering functionality
- Containerized local development environment using Docker Compose

School Website Content Management API | *Laravel, MySQL*

Sept. 2025 – Nov. 2025

- Developed REST APIs using Laravel to manage content for a school website, including news, announcements, galleries, and informational pages.
- Implemented authentication, CRUD operations, filtering, pagination, and search functionality for content management.
- Designed relational database schemas to support content publishing and website management features.

EDUCATION

State Vocational High School 2 Mojokerto

Software Engineering (Vocational Program)

Mojokerto, Indonesia

Jul. 2023 – Jun. 2026
